To the Bill & Melinda Gates Foundation and judging panel:

Included for your consideration is DragonID, LLC's electronic design prototype and accompanying narrative for the "Records for Life" contest. The complete contents of our submission are:

- Electronic prototype design.
- Picture and schematics for the prototype casing – ready to be 3D printed.
- Narrative of the prototype function and deployment.

In addition to the main category of the contest, we request that our entry also be considered for all three additional categories: Ease of Adding New Information, Visualization of Data, and Retroactive Data entry. All three additional categories are detailed at the end of the Narrative part of our submission.

Our solution to the durability problem was two-fold: an improved material for the record itself, as well as a protective casing. Both are detailed extensively in the Narrative part of our submission.

Thank you for your consideration,

Eugene Malinskiy
